

***High efficiency,
reliable solution!***

**Power Solutions for
Mining Industry**

WHENEVER YOU NEED POWER, WE ARE ALWAYS WITH YOU...SINCE 2007!

Since 2007 , Mar-Kim has been delivering high quality tailor made solutions that are designed accordingly to your requirements with strong after-sales technical support and maintenance services anytime and anywhere you need uninterrupted power supply. When your company is moving further ahead rapidly on the road to success, you always feel our continuous support as your reliable power solutions partner.

Because Markim is a member of your family...

SOLUTIONS
FOR
MINING
INDUSTRY

We know the challenges of your business, and we design tailor-made solutions that exceed your expectations...

Thanks to our high performing and robust solutions that are specially designed for mining industry, not only on the surface but also under the ground we are always there for you. With Markim's quality products that have low fuel consumption, high efficiency rates even under the most challenging conditions such as dust, vibration, high or low temperature, you will always be on the safe side.

While custom-made power solutions of Markim decrease your opex with their low fuel consumptions, their robust structures minimize the risk of failure, their designs and state-of-the-art features provide easy maintenance. Not only with its reliable products but also with its comprehensive, fast technical and spare parts support, Markim will deliver added value to your business.

Markim not only manufactures mobile and stationary gensets with specially insulated canopies for the full protection against loud noise, fire as well as liquid contact, and can with optional features such as remote radiator, high capacity fuel tanks, remote monitoring system but also safe-guards your uninterrupted power through its strong after-sales services...

PROJECT REQUIREMENTS

Meeting the energy needs of the specially produced stone crusher.

THE SOLUTION WE OFFER

For continuous operation of the crusher, 2 pieces of 1100 kVA special type generators are used together with synchronization panels, field type air suction filters to prevent dusty environment effects and leaf type manual shutters to prevent dust from entering while the machine is running.

OPTIONS

- Bowl-type special vibration mounts between the engine and the frame, Specially designed panel with sheet metal protection,
- Reinforced, double-wall fuel tank with a special frame, Fuel filling strainer,
- Fuel tank ventilation in front of the radiator,
- Crankcase ventilation in front of the cabinet,
- Warning buzzer system for faults and low fuel level warnings,
- Interchangeable type sand filter for the air intake section of the cabinet, Special filter for the air exhaust section of the cabinet, leave type manual blind in front of the radiator.
